

B Temporary Bond

The Model TSI-B is a B-temporary bond used to temporarily ground a mobile home, light fixture, metallic conduit, power company hardware, power ground wire, or other metallic objects in the telephone company workspace which could become energized if a fault developed.

The Model TSI-B consists of a 5 foot length of 14 gauge UL style 3239 wire with a Mueller 24A clip on one end. On the other end is a Mueller 11A clip with a spring attached to the clip to ease the metal fatigue stresses on the wire.

Length: 5' between clips
Wire: 150°C 20KVDC UL 3239/CSA TV-20
